

# 2872B Grind

The Model 2872B Grind Downdraft Table is designed to accommodate a variety of sanding, metal grinding, welding, and light plasma applications.

Optional chimney may be purchased to take exhaust air from the floor and direct it towards the ceiling. An optional muffler, similar to the chimney pictured, may also be purchased to reduce the sound by 8-12 decibels.

A removable spark shield with hinged ends provides spark protection for area workstations.

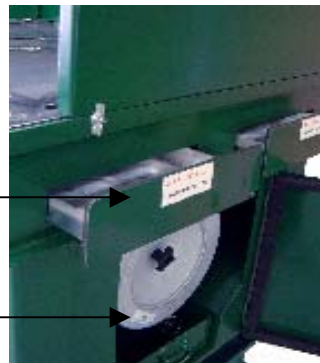

Tabletop surface is composed of durable 1/4" metal plate.

Pushbutton cleaning blows dust from the filter, dropping dirt into the dustpan below. Automatic filter cleaning done by a timer is optional. Spunbond cartridge filter cleans 99.95% of particle size .5 micron and larger.

*\*Pictured without casters, which are a standard feature\**

Newly designed water pans offer easy exterior access for water maintenance.

A filter / dustpan door allows easy dirt removal and filter access.

Dimensions: 28" X 72", Height – 34"  
Motor: 1.5 HP, Single or Three Phase

CFM: 3400 @ 1" Static
